

## **60 Second RHA Radio Spot**

**(May 2010)**

Hello, I'm Corene Debreuil of the RHA Central here to mark Emergency Medical Services Week May 16 to 22<sup>nd</sup>. This week is dedicated to extend appreciation and awareness for the work of our Paramedics, Dispatchers and First Responders for their unique and valuable contributions.

In Central Region, our EMS has 16 to 18 ambulances operating as a seamless region-wide service every day. We use a system called dynamic deployment where, based on the emergency activity, ambulances position within the region to ensure maximum coverage and minimum response time. No matter where the emergency: we are here for you.

You too can help *us*, help *you* this summer. Help prevent accidents by playing and working safely.

If you do need an ambulance, call 911. Stay calm -- the dispatcher will ask you a lot of important questions. Also, stay on the line -- the dispatcher is sending help while speaking with you and he or she can provide advice as you wait for EMS to arrive.

Wishing you a safe and happy summer, that's May's MONTH IN REVIEW from the RHA Central, helping you become, **AS HEALTHY AS CAN BE!**
