

60 Second RHA Radio Spot

(May 2011)

Did you know that car crashes kill more children than any other injury? Did you know that when children use proper car seats, they are less likely to be severely injured? The good news is that parents and caregivers can choose the right car or booster seat for their child.

Hello, I'm Jenn Baker Director of Healthy Living for RHA Central and I am here to speak to you about Child Passenger Safety and to mark *Safe Kids Week* taking place May 30 - June 5.

Injuries related to motor vehicle collisions are the leading cause of injury-related death in our kids. With today's car seat designs, parent education is paramount to ensure successful car seat installation and compliance.

So during Safe Kids Week RHA Central staff will team up with local certified seat inspectors and together will host inspections in many communities across the Region. For more information on dates and locations, visit www.rha-central.mb.ca or contact us at 822-2632. That's 822-2632. We invite you to come out and learn about keeping our Kids Safe! We look forward to seeing you!

That's May's MONTH IN REVIEW from the RHA Central, helping you become, **AS HEALTHY AS CAN BE!**
